

# **LIFE-SAVING VACCINES SHOULD BE FREE**

**COVID vaccines are life-saving** tools that also reduce transmission and decrease long-term health impacts. COVID continues to mutate, and **vaccine-based protection wanes** after 3-6 months. **Regular booster shots are necessary** to protect all our health, and vaccines work best when everyone takes them. But the **Biden-Harris administration is no longer covering free vaccines** for the millions of uninsured US adults. Out of pocket costs for new boosters are \$200 for uninsured people. These **vaccines were developed with taxpayer money**. The government must ensure they are now freely accessible to all.

**We can do better. We can protect each other.  
Tell Biden and Harris: fund free updated COVID  
boosters for all!**
